AND VARIABLES WITH THE USE OF PLACE-MARKS**

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:
the closest prior art of record are the Bowman-Amuah patents (USPN #6,742,015 B1 and #6,715,145 B1). Both patents teach implementation of batch systems with traditional and object oriented implementation. Furthermore, the ability to implement wrappers to communicate between traditional and object oriented systems is taught. the claimed invention teaches providing a framework where the batch system is automatically generated based on identifying positions in the code (place-marks). the place-marks provide for a the ability to identifying them, and inserting invariants, declarative statements (code) and variables. An approach that provides for reuse and the ability to maintain the system not taught in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
